

Modern teachers during the pandemic I can say is difficult because everything will change. We will communicate in the way of social media or modern technology, although it is difficult for teachers because it is necessary to practice wisdom using gadgets to deliver to students are what they should learn. So SEAMEO Online Series is a huge thing for teachers because as our knowledge increases through speakers we get ideas to facilitate the acceptance of time now. And to share the future adjustments of the children today, we need more teachers like you to increase our knowledge. And additional knowledge to our teachers for the mental preparation in the new normal for our students, parents and also our teachers on emerging technology. And at the same time teachers need more webinars that can help us to expand our needs that we can apply to students. Thank you, for the opportunity you are giving to us. God Bless!
