

2nd Session of SEA-Teacher-TVET Lecture-Series

Theme: Innovative Teacher Education in The New Normal

Educational trends in the Philippines was dramatically changed and redesigned, forced by the risk and fear of pandemic covid-19. The traditional actual teaching and learning process has to be restructure to cope up with the need of continuous education amidst the pandemic.

The Department of Education (DepEd) come up with modular mode of learning mostly in public school and remote areas, radio and television were also considered as supplemental platform for learning, and technology-based learning has much to offer. Online distance learning was considerable best options in most of places where internet connectivity is good enough to cater the efficiency of educating learners.

The big change would probably laid the questions of readiness of the teachers in the task/ mode of teaching. Are they actually equip with skills to facilitate learning in virtual world? But teachers are flexible and resourceful. They easily adapt and find their ways to access the trends, and opportunity always knock for the strong-willed and resilient people. SEAMEO open the door for teachers. This webinar series offered by the organization is an avenue for teachers to learn and armored of knowledge and skills needed in this New Normal. It is also an excellent way to collaborate with the neighboring country with their teaching styles and practices. This will also unlock teacher potential by developing positive, respectful relationship to others and promotes appreciation and understanding of diversified culture and history among us Asians educator and learner.

It's time to innovate the teaching method and connect and collaborate to a much better output of learning. SEAMEO will lead as one through effective and efficient facilitator of learning.
