

SEAMEO is truly an avenue for teachers as well as students on gaining knowledge on how to successfully face our current situation. It exposed participants to a wide range of platforms and applications to connect with one another thus making this school year possible. I believe that education is a right, therefore it must be offered with everyone considering their limits and capacities on online learning. This webinar series would help me, personally and professionally, on handling this upcoming school year. With the support and participation of SEA countries, I know we will have a fruitful and interesting blended learning experience.
