Innovative Teacher Education in the New Normal

This SEAMEO Webinar which I have watched was very useful to my professional development as a teacher. I have seen a lot of webinars in preparation to the opening of classes in the new normal. But still I've got new learnings from this webinar like using Facebook as a social learning group and using Instagram as a platform/tool of teaching and learning. There are a lot of online application mentioned that seems interesting to use like Padlet. And it is beneficial to hear things like psychological first aid which is not only helpful to students but also for us professionals. With the information you have shared, it will help us more equipped with a variety of technology and online application we can choose on as an effective tool to use in blended or online teaching. I heard a lot of practiced from lecturers/speakers from member countries of SEAMEO which I think are practical and effective to use. Thank you very much for giving me a chance to witness and learned from your webinar.
