

11th SEAMEO-University of Tsukuba Symposium (Virtual)
Technology and Values - Driven Transformation in Education
20-22 February 2023

ABSTRACT

Dr Wahyudi
SEAMEO Regional Open Learning Centre (SEAMOLEC)
Indonesia

Topic: SEAMEO SEAMOLEC'S Initiatives on Technology and Values-Driven Transformation in K-12 Education

Values-Driven Transformation in education refers to the process of aligning the actions, policies, and decision-making of an educational institution with its core values and mission. This process involves identifying and communicating the institution's values, integrating them into all aspects of the educational experience, and holding all members of the institution accountable for living up to these values.

In an educational context, values-driven transformation may involve incorporating a focus on social and emotional learning, diversity, equity, and inclusion into curriculum and instruction, as well as creating a culture in which these values guide all actions and decision making within the institution. The goal of values-driven transformation in education is to create an educational environment that is inclusive, equitable, and prepares students to be responsible and ethical citizens.

This presentation will showcase a couple of initiatives conducted by SEAMOLEC in relevance with the technology and values-driven transformation for teachers in Southeast Asia.
