Synopsis

Topic: Malware Analysis

Dr Vimal Kumar

Senior Lecturer
Faculty of Computer Science
University of Waikato
New Zealand

This 20 minute webinar is going to be a masterclass on Malware Analysis by Dr. Vimal Kumar. The class will introduce to the audience the highly specialized field of malware analysis in cybersecurity. The focus of the class will be limited to some techniques that are used to analyze malware binaries statically.

In the class you will learn how a malware analyst begins when given a piece of malware, the preliminary techniques that they use and the simple but useful information that they and in fact anyone can extract to identify malware.
